### Room disinfection with H<sub>2</sub>O<sub>2</sub>

During the Corona crisis, the need for solutions for easy, fast and safe disinfection of entire rooms has increased. The focus is no longer only in the operating room or the patient room, but also in public areas like buses or in the railway area. Systems for room disinfection with hydrogen peroxide (H<sub>2</sub>O<sub>2</sub>) have a large market share. Small, smart and wireless H<sub>2</sub>O<sub>2</sub> sensors can be developed on the basis of m-u-t NIR gas sensor technology to control the functional concentration at different points in the room or the MAK value.
